

To Whom It May Concern,

I am writing this letter to provide a reference for Rithika Bhargav K, who has worked at Cyient on Machine Learning/AI since July 2024. During her tenure, she has consistently demonstrated exceptional expertise and dedication in the fields of Machine Learning, Artificial Intelligence, and related technologies.

Rithika has played a pivotal role in developing an ADAS feature called Material Volume Assessment in our project. Her proficiency in tools and technologies such as Python, TensorFlow, PyTorch, OpenCV, and advanced algorithms has been instrumental in the success of our project feature.

One of the highlights of her work has been multi-class segmentation model using a U-Net model with the help of transfer learning and defining KPIs for ML models. This project showed her ability to not only build effective models but also integrate them seamlessly into production systems.

In addition to her technical skills, Rithika has displayed remarkable problem-solving abilities, a collaborative spirit, and an eagerness to mentor colleagues. These attributes make her a valued member of any team and a professional capable of thriving in diverse work environments.

I have no doubt that Rithika will continue to excel in both academic and professional endeavors. and contribute significantly to any organization. In both academic programs and professional teams, her dedication to excellence and depth of expertise makes her an asset to any institution or organization. I wholeheartedly recommend her for any opportunities she may pursue.

Please do not hesitate to contact me at nagesh.shenoy@cyient.com should you require further information.

Sincerely,

Nagesh shenoy

Nagesh Shenoy Bantwal Toledar
Vice President
Cyient
Bangalore, India.
